HOW TO PROTECT YOURSELF FROM SICKNESS

VACCINES AVAILABLE: [HTTPS://FLORIDAHEALTHCOVID19.GOV/](https://FLORIDAHEALTHCOVID19.GOV/)

To stay up to date with information go to Centers for Disease Control and Prevention
<https://www.cdc.gov/coronavirus/2019-ncov/prevent-getting-sick/prevention.html>

Know how it spreads

- There is currently no vaccine to prevent coronavirus disease 2019 (COVID-19). The best way to prevent illness is to avoid being exposed to this virus.
- The virus is thought to spread mainly from person-to-person or people who are in close contact with one another (within about 6 feet).
- Through respiratory droplets produced when an infected person coughs, sneezes or talks. These droplets can land in the mouths, noses (possibly inhaled into the lungs) or eyes of people who are nearby.

Wash your hands often

- Wash your hands often with soap and water for at least 20 seconds especially after you have been in a public place, or after blowing your nose, coughing, or sneezing.
- If soap and water are not readily available, use a hand sanitizer that contains at least 60% alcohol. Cover all surfaces of your hands and rub them together until they feel dry.
- Avoid touching your eyes, nose, and mouth with unwashed hands.

Avoid close contact

- Avoid close contact with people who are sick, even inside your home. If possible, maintain at least 6 feet between the person who is sick and other household members.
- Put distance between yourself and other people outside of your home.
- Remember that some people without symptoms may be able to spread virus.
- Stay at least 6 feet (about 2 arms' length) from other people.
- Do not gather in groups and stay out of crowded places and avoid mass gatherings.

Cover your mouth and nose with a face cover when around others

- You could spread COVID-19 to others even if you do not feel sick.
- Everyone should wear a facemask when they have to go out in public, for example to the grocery store or to pick up other necessities.
- Face coverings should not be placed on young children under age 2, anyone who has trouble breathing, or is unconscious, incapacitated or otherwise unable to remove the mask without assistance.
- The face cover/mask is meant to protect other people in case you are infected.
- Continue to keep about at least 6 feet between yourself and others. The facemask is not a substitute for social distancing.

Cover coughs and sneezes

- If you are in a private setting and do not have on your face covering, remember to always cover your mouth and nose with a tissue when you cough or sneeze or use the inside of your elbow. Throw used tissues in the trash.
- Immediately wash your hands with soap and water for at least 20 seconds. If soap and water are not readily available, clean your hands with a hand sanitizer that contains at least 60% alcohol.

Clean and disinfect

- Clean AND disinfect frequently touched surfaces daily. This includes tables, doorknobs, light switches, countertops, handles, desks, phones, keyboards, toilets, faucets, and sinks.
- If surfaces are dirty, clean them. Use detergent or soap and water prior to disinfection.
- Then, use a household disinfectant. Most common EPA-registered household disinfectants will work.

Monitor Your Health

- Be alert for symptoms. Watch for fever, cough, shortness of breath, or other symptoms of COVID-19. Especially important if you are running essential errands, going into the office or workplace, and in settings where it may be difficult to keep a physical distance of 6 feet.
- Take your temperature if symptoms develop.
- Don't take your temperature within 30 minutes of exercising or after taking medications that could lower your temperature, like acetaminophen.
- Follow CDC guidance if symptoms develop.
