

CITY OF DUNEDIN WATER USE RESTRICTIONS

For ALL water sources EXCEPT Reclaimed Water

EFFECTIVE DATE: March 06, 1997

To maintain the health of the City's wellfield, the Dunedin City Commission enacted Resolution 91-37, Water Use Restrictions, effective September 12, 1991 with an amendment, Resolution 97-08, effective March 6, 1997. These Water Use Restrictions are in cooperation and combination with the Southwest Florida Water Management District (SWFWMD). Provided below are the current water use restrictions as they apply to all water sources except reclaimed water.

1. Addresses ending in an even number may irrigate only on Tuesdays.
2. Addresses ending in an odd number or with no address may irrigate only on Fridays.
3. The hours of irrigation for users with an in-ground sprinkler system (whether manual or automatic) are from 12:00 Midnight to 10:00 AM only, based on the watering schedule above.
4. The hours of irrigation for users of manual equipment are limited to once a day based on the watering schedule above; either 12:00 midnight to 8:00 AM or 6:00 PM to 12 midnight.
5. Hand-watering and micro-irrigation of plants (other than lawns) can be done on any day and any time.
6. No irrigation is allowed on Mondays, Wednesdays, Thursdays, Saturdays, or Sundays.
7. Washing or cleaning of streets, sidewalks, driveways, or other impervious areas with water is prohibited.
8. Outside pressure cleaning shall be restricted to only low volume methods.
9. Car washing is allowed any time. Car Washing must be accomplished using a hand held hose with a shut off device.
10. Rinsing boats and flushing boat engines is limited to a maximum of ten minutes once per day for each boat.
11. Operation of aesthetic fountains and waterfalls is not restricted.
12. Filling and refilling swimming pools is not restricted.
13. Irrigation of new landscaping (up to 30 days after installation) is not legally restricted in hours or days but should be limited to the prescribed irrigation hours when possible. You must keep your receipt for verification purposes and over 50% of the area you are watering must be new vegetation.
14. A verticut lawn may only receive two extra waterings: immediately upon removal of the thatch and then one week later to water-in a complete fertilizer. Turfgrass removed and then reinstalled in the same location within 48 hours may only receive two extra waterings: immediately upon reinstallation and then one week later. An overseeded lawn may receive no extra waterings.
15. Turfgrass replacement establishment will be restricted for a period of 30 days. On days 1-15, beginning the day of installation, the new or replacement turfgrass may be watered every day of the week. On days 16-30, the new or replacement turfgrass may be watered approximately every other day. You must keep your receipt for verification purposes and over 50% of the area you are watering must be new vegetation.
16. The watering in of herbicides, fungicides, or insecticides where such watering in is required by the manufacturer or state, federal, or local law is not restricted, but must be limited to minimum necessary.
17. The watering in of fertilizers is prohibited except on the watering day and times prescribed for irrigation.
18. The use of (low volume) pressure cleaning equipment to wash buildings, mobile homes, and other stationary objects is not restricted.
19. Homeowners associations and other entities must suspend any requirements to replace lawns or engage in other activity which increases water use during this water shortage declaration.

Typically, **outdoor water use accounts for up to 50 percent of water consumed** by households. You can reduce outdoor water consumption by taking a few simple steps; periodically check irrigation system timer performance and effectiveness, or as a service, the City will set irrigation timers upon request to the watering schedule for your address.

If you have any questions, please call the Water Division (727) 298-3100
