Atlanta, GA 30303-8960

NOTICE OF AVAILABILITY PROPOSED TOTAL MAXIMUM DAILY LOADS (TMDLs) FOR WATERS AND POLLUTANTS IN THE STATE OF FLORIDA

Section 303(d) of the Clean Water Act requires each state to compile a list of those waters within its boundaries for which technology-based effluent limitations are not stringent enough to protect any water quality standard applicable to such waters. Listed waters are prioritized with respect to designated-use classifications and the severity of pollution. In accordance with this prioritization, states are then required to develop Total Maximum Daily Loads (TMDLs) for those listed waters. The TMDL process establishes the allowable loadings of pollutants or other quantifiable parameters for a waterbody based on the relationship between pollution sources and in-stream water quality conditions, so that states can establish water quality based controls to reduce pollution from both point and non-point sources and restore and maintain the quality of their water resources (USEPA, 1991).

In the past, EPA Region 4 has published public notices which announced the availability of EPA's proposed TMDLs for waterbodies for some of the waters listed below, and requested comments from the public on those proposed TMDLs. Since the original public notice, these TMDLs have been revised. EPA is proposing these TMDLs in order to meet consent decree requirements pursuant to the Consent Decree entered in the case of Florida Wildlife Federation, et al. v. Carol Browner, et al., Case No. 98-356-CIV-Stafford. The TMDLs as currently proposed reflect revisions that were deemed appropriate by EPA to address new information that has been received since the original proposal, including public comments received in response to EPA's prior public notice. EPA, hereby, withdraws the previously proposed TMDLs. Persons who believe that previously-submitted comments have not been adequately addressed by EPA are encouraged to resubmit those comments in writing by no later than August 27, 2012. Prior to finalizing these TMDLs, EPA will consider only those timely, written comments provided in response to this public notice.

The waterbody impairments on Florida's 303(d) list that are addressed by the proposed TMDLs are listed below.

River Basin	Waterbody Name	Waterbody Identification (WBID) Number	§303(d) List Pollutant(s)
Springs Coast	Pithlachascotee River	1409	Dissolved Oxygen
Springs Coast	Ancolote River (tidal)	1440	Nutrients, Dissolved Oxygen, BOD
Springs Coast	Ancolote River (freshwater)	1440F	Nutrients, Dissolved Oxygen, BOD
Springs Coast	Hollin Creek	1475	Dissolved Oxygen
Springs Coast	Direct Runoff to Gulf	1535	Nutrients, Dissolved Oxygen

Springs Coast	Cedar Creek (tidal)	1556	Nutrients, Dissolved Oxygen
Springs Coast	Pinella Park Ditch No 1	1662	Nutrients, Dissolved Oxygen
Springs Coast	34th Street Basin	1716A	Nutrients, Dissolved Oxygen
Springs Coast	Clam Bayou Drain	1716B	Nutrients, Dissolved Oxygen
Springs Coast	Clam Bayou (east drainage)	1716C	Nutrients, Dissolved Oxygen
Springs Coast	Calm Bayou (tidal)	1716D	Nutrients, Dissolved Oxygen
Upper East Coast	Guana River	2320	Dissolved Oxygen
Upper East Coast	Pellicer Creek	2580B	Nutrients, Dissolved Oxygen
Upper East Coast	Tomoka River	2634A	Nutrients, Dissolved Oxygen
Upper East Coast	Unnamed Ditch	2666	Nutrients, Dissolved Oxygen
Pensacola	Pace Mill Creek	420	Dissolved Oxygen
Pensacola	Jones Creek	846A	Dissolved Oxygen
St. Lucie - Loxahatchee	Tenmile Creek	3194A	Nutrients, Dissolved Oxygen, BOD
St. Lucie - Loxahatchee	St. Lucie River (South Fork)	3210B	Nutrients, Dissolved Oxygen, BOD

Persons wishing to comment on the proposed TMDLs or to offer new data or information regarding the proposed TMDLs are invited to submit the same in writing or electronically (preferred method being electronic copies of Word documents) to cole.sibyl@epa.gov within 60 days of this notice, to the U.S. Environmental Protection Agency, Region 4, Water Protection Division, 61 Forsyth Street, S.W., Atlanta, Georgia 30303-8960, ATTENTION: Ms. Sibyl Cole, Pollution Control and Implementation Branch. It is possible that formats other than Microsoft Word may not be properly converted during the response process.

A copy of each of the proposed TMDLs can be obtained through the Internet or by contacting Ms. Cole at (404) 562-9437 or via electronic mail at cole.sibyl@epa.gov. The URL address for the proposed TMDLs is: <http://www.epa.gov/region4/water/tmdl/florida/>. The proposed TMDLs and supporting documents, including technical information, data, and analyses, may be reviewed at 61 Forsyth Street, S.W., Atlanta, Georgia, between the hours of 8 AM and 4:30 PM, Monday through Friday. Persons wishing to review this information should contact Ms. Cole to schedule a time for that review.
