

## **DREAM**

Dunedin's Resilient Environmental Action Master Plan  
Planning Meeting II  
12/9/19 2:00 PM; Aberdeen Room, Community Center  
1920 Pinehurst Rd, Dunedin, FL 34698

### **Discussion**

- **Recap of last meeting / minutes**
  - Coordinate with Craig to come up with a policy to measure tree removal due to solar installation
  - Coordinate with Frances and Bob Ironsmith on solar power and affordable housing. Alan developed tool to analyze this. Look into Eco Village to see what best worked for them and what things they would have done differently. Vicki mentioned the idea to install sustainable gardens in affordable housing areas and developments. Whitney said this is encouraged (not required) through the Sustainability Matrix.
- **Discuss other municipal plans and formats**
  - [Largo Environmental Action Plan \(LEAP\) 2018](#)
  - [St. Petersburg Integrated Sustainability Action Plan \(ISAP\)](#)
  - [2018 Orlando Community Action Plan](#)
  - [Clearwater GreenPrint 2011](#)
  - [Miami-Dade County GreenPrint](#)

Group consensus: Everyone liked the format of Largo's plan because it is very clear, concise and user friendly. A senior citizen or a high school student can both pick up the document and digest the material easily. It is an easy read in the beginning and has a reference to a more technical section in the back. Largo addressed Ready For 100 under multiple projects. Largo highlighted their strategic plan in the beginning to show connectedness; Dunedin could do this with its EPIC! goals. Dunedin could use Dunedin logo colors to label projects with a status of: below goal, in progress, met goal, or exceeds goal. Dunedin could use labels or icons to show what initiatives are multi-faceted.

## Action Items

- **Outline a list of project**

- Clean Energy and efficiency
- Ready For 100
- Green House Gas reduction
- Pollution
- Green Buildings
- Sea level rise
- Stormwater
- Florida Gulf Coast Hope Spot
- Habitat protection
- Wildlife protection
- Development
- Human Health/community health
- Carbon Footprint
- Hurricane preparedness
- Living shorelines
- Vulnerability
- Infrastructure planning
- Waste reduction
- Composting
- Biodigesters
- Plastic reduction
- Carpooling
- Biking
- Walkability
- Transportation
- Public transportation
- Native plants
- Tree canopy
- Green spaces
- Parks and natural spaces
- Sustainable landscaping
- Florida Friendly landscaping
- Ocean Friendly landscaping
- Edible landscaping

- **Categories from other plans**

- **Largo**
  - Infrastructure
  - Natural Resources
  - People & Services
- **Clearwater**
  - Green Energy & Buildings
  - Transportation
  - Land Use & Urban Form
  - Water Resources
  - Waste Management
  - Food Production
  - Green Business & Jobs
- **Orlando**
  - Clean Energy
  - Green Buildings
  - Local Food
  - Livability
  - Solid Waste
  - Transportation
  - Water

- **St. Petersburg**
  - Equity & Empowerment
  - Economy & Jobs
  - Health & Safety
  - Climate & Energy
  - Realizing Resilience
  - Built Environment
  - Natural Systems
  - Innovation & Process
  - Education, Arts & Community
- **Miami-Dade**
  - Strong Leadership, Connections & Commitment
  - Water & Energy Efficiency
  - Our Environment
  - Responsible Land Use & Smart Transportation
  - Vibrant Economy
  - Healthy Communities
  - Climate Change Action Plan
- **DREAM team ideas**
  - Earth, Air, Water
  - Triple Bottom Line: People, Planet, Profit

- **Audience**

- Discussion of having sections in each category to educate the audience on how they can participate. Create distinction between different audiences: City staff, Community/Citizens, Business, Schools. Other idea is to separate it based on size of group: individual level, group level, organization level.

- **Define stakeholders – create list:**

- City employees
- Committee on Environmental Quality (CEQ)
- Blue-Green Connections
- Pinellas County
- Department of Environmental Protection (DEP)
- Pinellas County IFAS Extension
- Sierra Club
- Dunedin Community Garden
- Dunedin businesses and merchants
- Keep Pinellas Beautiful
- Pinellas Composting Alliance

- Southern Alliance for Clean Energy
  - Ethnic groups, Native American groups
  - Historical groups
  - Fish and Wildlife Conservation Commission (FWC)
  - Tampa Bay Regional Planning Council
  - Tampa Bay Watch
  - Tampa Bay Estuary Program
- **Reference Documents**
    - City of Dunedin Comprehensive Plan
    - City of Dunedin Strategic Plan / EPIC! Goals
    - Stormwater Master Plan
    - USF Studies
  - **Develop working groups**
    - This will be moved to the next meeting.

### **Next Steps:**

- Review list of projects and create 7-10 categories that the projects could nest under. Suggest other possible projects if they have not been listed.
- Review list of stakeholders and provide input for what categories certain stakeholders should play a role in. Suggest other possible stakeholders that have not been listed.
- Look at the various categories that you create and start thinking about which section(s) you would like to contribute to while writing DREAM.
